

BCA58

CHARGING CASE FOR THE A58 GUITAR WIRELESS SYSTEM

The Xvive BCA58 Charging Case is specially designed for the A58 Guitar Wireless System. It's an all-in-one solution that integrates storage, charging, and portability, tailored for performers and musicians. With its three core functions—secure storage, fast charging, and extended battery life—it's the ideal companion for your A58 system, whether on stage, in the studio, or on the go.

Equipped with a high-capacity internal battery, the BCA58 allows multiple full or partial recharges for both the Transmitter and Receiver. The custom-molded interior ensures your gear stays secure and protected in transit, making it a reliable power and storage solution for live gigs, rehearsals, and travel.

EFFICIENT CHARGING FOR PEACE OF MIND

The built-in 5000 mAh lithium battery provides up to two full charges or multiple top-ups for the A58 Transmitter and Receiver. When combined with the A58's 5+ hours of single-use battery life, the BCA58 easily supports an entire day of performances—eliminating battery anxiety so you can focus fully on your performance.

USB-C CHARGING INTERFACE

BCA58 utilizes a standard USB-C port, fully compatible with most 5V/2A chargers and power banks on the market. Enjoy fast, stable charging anytime, anywhere.

SMART FEATURES FOR EASY OPERATION

The case features auto full-charge detection and auto shutoff—simply place your Transmitter and Receiver into the designated slots, and charging begins automatically. Once fully charged, the case stops charging to protect battery health and extend lifespan.

PORTABLE AND DURABLE DESIGN

Built with durable 1680D fabric and high-strength ABS engineering plastic, the case offers excellent impact resistance and wear protection. The compact and lightweight form makes it easy to slip into an instrument bag or backpack, ensuring hassle-free portability wherever you go.

Hereby, SHENZHEN FZONE TECHNOLOGY CO., LTD, declares that this type of equipment is in compliance with the essential requirements and other relevant provisions of Directive 2014/53/EU

INFORMATION ABOUT COLLECTION AND DISPOSAL OF OLD ITEMS AND USED BATTERIES

[For customers in the European Union]

If you want to discard electrical and electronic items, please contact your dealer or supplier for further information.

These symbols on the products, packaging, or on any documents in the package mean it is incorrect to mix the used electrical and electronic products and batteries with general household garbage. These symbols are only valid in the EU. Please contact your local authorities or dealer for more information on the disposal of old items and used batteries:

To protect our environment, please take old products and used batteries to proper collection places, and follow your national legislation and the Directives 2012/19/EU and 2006/66/EC.

[Information on Disposal in Countries outside the European Union]

To deal with these old products and batteries properly, please help to save valuable resources and prevent any possibility of side effects on human health and our environment due to the inappropriate disposal of the old products and used batteries.

Cd

Please contact your local authorities to get more helpful information on how to dispose of old products and batteries.

SAFETY INSTRUCTIONS FOR LITHIUM-ION RECHARGEABLE BATTERIES

If abused or misused, the rechargeable batteries may leak. In extreme cases, they may even present a risk of explosion, fire, heat, smoke or gas. Xvive does not accept any liability for damage arising from abuse or misuse.

- Keep away from children.
- Only charge rechargeable batteries with chargers recommended by Xvive.
- Observe correct polarity.
- Pack/store charged rechargeable batteries so that the terminals cannot contact each other (danger of shorting out/fire hazard).
- Do not expose to moisture.
- Switch rechargeable battery-powered products off after use.
- Only charge rechargeable batteries at ambient temperatures between 10°C/50°F and 40°C/104°F.
- When not using rechargeable batteries for extended periods of time, charge them regularly (about every three months).
- Do not mutilate or dismantle.
- Do not heat above 60°C/140°F, e.g. do not expose to sunlight or throw into a fire.
- Immediately remove rechargeable batteries from obviously defective products.
- Do not continue to use defective rechargeable batteries.
- Only use rechargeable batteries specified by Xvive.
- Dispose of rechargeable batteries at special collection points or return them to your specialist dealer.
- Store the products in a cool and dry place at room temperature (approx. 20°C/68°F).
- Remove the rechargeable batteries if the products will not be used for extended periods of time.
